CARE & MAINTENANCE

@OMMPL

REGULAR CLEANING

Common household spills – such as tea, coffee, juice, soda, vegetable juice, olive oil, liquid food coloring, or grease spills – are easily removed and the surface is restored to its original appearance by using any commonly available multi-purpose cleaner or mild detergent, then rinse off with warm water after use and dry with soft cloth or paper towel.

Those wishing to use environmentally safe cleaners may also use a combination of 50/50 vinegar & water, rinsing afterwards.

CLEANING STUBBORN STAINS

For stubborn or dried spills, use a non-abrasive cleaning pad such as a 3M Scotch-Brite scrub pad combined with a small amount of mild soap or specialized stone cleaner (not directly onto the countertop). Wipe the area using a circular motion, rinsing thoroughly with water and dry with soft cloth or paper towel.

DRIED RESIDUE

For food, chewing gum, nail polish, paint or any foreign matters that are strongly adhered to any Owais Quartz Surfaces, simply scrape them away with a sharp plastic scraper. If a metal blade is used in scraping, it may leave grey marks on the surface which an ordinary scouring pad will easily remove. Wash and rinse the surface with clean water.

CLEANING IN HIGH TRAFFIC AREAS

In general, it is recommended to entrust the cleaning in high traffic areas to specialized companies. However, we list at least some of the most important rules: * Forcleaningofcontinuouslyverydirtyfloors,useonlyrecommendedproductsandnotthemixturesofchemicals. * Owais quartz surfaces in high traffic areas should be cleaned daily with a clean, dry soft bristle broom. * Spills should be spot treated with the use of a damp cloth towel and, if necessary, a small amount of mild soap or specialized stone cleaner. * A floor machine such as a slow speed buffer or walk behind scrubber can be used for larger commercial environments.

RESISTANCE TO SCRATCH

Quartz is one of the hardest materials in nature, which is your assurance that your Owais surface will not easily scratch or chip. To keep the surfaces in immaculate condition for years, always use a cutting board for food preparation. Never cut directly on a countertop surface.

OMMPL

CARE & MAINTENANCE

@OMMPL

Exposure to Chemicals and Solvents:

Common household spills like tea, coffee, juice, soda, vegetable juice, olive oil, liquid food coloring, or grease can be easily cleaned with a multi-purpose cleaner or mild detergent. Rinse the surface with warm water and dry with a soft cloth or paper towel.

Avoid prolonged exposure to cleaning solutions, chemicals, or solvents, especially those containing trichloroethane or methylene chloride found in paint removers or furniture strippers. Additionally, steer clear of oven grill cleaners, floor strippers, paint removers, oil soaps, toilet bowl cleaners, tarnish removers, furniture cleaners, drain products, battery acid, and dishwasher detergent. These substances may cause permanent damage or discoloration to the countertop surface.

While casual exposure to alkaline materials won't harm OMMPL, avoid using highly alkaline (high-pH) cleansers. If any of the listed substances come into contact with Owais, rinse the exposed surface immediately and thoroughly with clean water. Do not use strong abrasive or alkaline cleaning products.

Resistance to Heat:

To maintain OMMPL's natural beauty, refrain from placing hot skillets, roasting pans, electric frying pans, crock pots, or toaster ovens directly onto the surface. Use a trivet instead to protect the countertop.
